

Marina M. Dunn

Pronouns: she/her/hers Nashville, TN 37067 615-525-8174 marina.dunn@email.ucr.edu
marinadunn.github.io github.com/marinadunn linkedin.com/in/marina-dunn orcid.org/0000-0001-5374-1644

Profile

Highly enthusiastic, motivated, determined Data Science Graduate Student doing interdisciplinary Machine Learning & Astrophysics research. Experience working in industry, government, & academia, and passionate about STEM outreach.

Education

M.Sc. Engineering: Data Science

JUNE 2023 (EXPECTED)

University of California, Riverside (Riverside, CA)

GPA: 4.0

Coursework: Data Science, Statistical Computing, Research Design, Data Mining, Machine Learning, Engineering Principles

Additional Course in Data Science (Non-Degree Seeking)

SUMMER 2020

University of California, Berkeley (Berkeley, CA)

GPA: 4.0

Coursework: Data Science

B.Sc. Astronomy

MAY 2018

University of Arizona Steward Observatory (Tucson, AZ)

Coursework: Classical & Quantum Physics, Theoretical & Observational Astrophysics, Orbital Dynamics, Computational Programming (including Astrophysics Applications, i.e. Galactic Data Modeling & Analysis), Mathematics

Fellowships, Grants & Awards

2023 WE Local Collegiate Competition Finalist (2022), WE22 Conference Grant (2022) - Society of Women Engineers,

Funds for Astronomical Meetings: Outreach to Underrepresented Scientists (FAMOUS) Travel Grant (2022) - American Astronomical Society,

Grace Hopper Celebration Student Scholar (2022) - AnitaB.org,

Uncertainty Quantification for Machine Learning Integrated Physics Modeling Travel Award (2022) - National Science Foundation/Sandia Laboratories,

Honors College Alumni Legacy Grant (2016) - The University of Arizona Honors College,

Arizona Excellence Scholarship (2014), Angelos C. Langadas Astronomy Department Scholarship (2017) - The University of Arizona

Posters & Presentations

Dunn, M. M., Lesser, D., O'Dougherty, S., Swift, B., Pat, T., Cortez, G., Smith, S., Goldsmith, P., & Walker, C. K. (2017). Terahertz Space Telescope (TST). [Poster presentation]. American Astronomical Society Meeting Abstracts #229, 229, 238.30. tinyurl.com/zppnpy9p [1]

Research Experience

Graduate Researcher – University of California, Riverside

SEP 2021 - PRESENT

Advisors: Dr. Aleksandra Ćiprijanović, Dr. Brian Nord, Dr. Bahram Mobasher

- Collaboratively working with Fermilab and Deep Skies Lab to research using Bayesian Neural Networks to accurately classify morphologies of galaxies with simulated mock datasets of different observing years and observational noise levels in preparation for the Legacy Survey of Space & Time. [7, 10]

CRESST II Research Assistant – NASA Goddard Space Flight Center

DEC 2022 - PRESENT

Advisor: Dr. Conor Nixon

- Researching application of Machine Learning techniques such as Convolutional Neural Networks to detect ice floes in the “chaos regions” of fractured ice on bodies like Europa.

Data Science Graduate Intern – NASA Langley Research Center

AUG - DEC 2022

Mentors: Douglas Trent, David Na

- As part of the “Machine Learning Showroom” project, developed simplified, cloud-based, “read-to-try” Machine Learning models, visualization tools, and online content for NASA teams to evaluate potential of using Machine Learning approaches for their work. [6]

Computing Scholar – Data Science Summer Institute, Lawrence Livermore National Laboratory

MAY - AUG 2022

Mentor: Dr. Ben Priest

- Developed tool for visualizing model optimization for the scalable Gaussian Process method MuiGPs, used to predictively fill in gaps of observations of orbital debris. [4]
- Researched various Machine Learning approaches using molecular descriptors and 3D atomic representations to rapidly screen drug-like compounds targeting SARS-CoV-2 in an effort to identify which may best treat the virus. [5]

Graduate Intern – NASA Goddard Space Flight Center

AUG 2021 - MAY 2022

Mentor: Dr. Alexey Shiklomanov

- Researched how to optimally migrate NASA Earth Science data & models to cloud-optimized, analysis-ready formats. [11]
- Developed improved interactive visualization/analysis dashboards for NASA fire data, including for near-real-time fire emissions forecasting, and vegetation data, such as the Surface Biology and Geology hyper-spectral imaging SHIFT campaign. [2, 3]

Undergraduate Research Assistant – University of Arizona

JUNE 2016 - SEP 2017

Advisor: Dr. Chris Walker

- Wrote proposals for a high resolution, spherical, space-based, inflatable observatory Terahertz Space Telescope. Presented proposal at the 2017 American Astronomical Society conference in Grapevine, TX. [1]
- Built and tested radio telescope antenna prototypes in a welding shop, presented preliminary results for the Office of Naval Research (ONR), resulting in full project funding.
- Wrote significant proposal components, procured institutional letters of intent and instrument estimates, managed large budgets, supported weekly science & engineering meetings for two NASA missions: the Europa Ice and Ocean Structure Seismometer (SIOS), and the balloon-borne observatory GUSTO. Additionally organized 2017 NASA site visit for GUSTO, marking project transition into the next mission phase, and \$40 million in funding.
- Analyzed sub-millimeter astronomy data of molecular transitions, created visual maps of gas flows within a giant molecular clouds using Python, and confirmed previous hypotheses about suspected ongoing star formation.

Undergraduate Researcher – University of Arizona Astronomy Club

JAN 2015 - MAY 2018

Advisor: Dr. Yancy Shirley

- Observed 101 dense, dark molecular clouds with the 12-Meter Arizona Radio Observatory Telescope on Kitt Peak, AZ, & determined which were actively collecting enough material to produce future stars using radiative transfer models. Published research in 2018.

Undergraduate Researcher – University of Arizona

AUG 2014 - DEC 2016

Advisor: Dr. Robert Zelle

- Observed transiting exoplanets and operated the Kuiper 61” Telescope on Mt. Bigelow, AZ, analyzed observational data in multiple wavelengths to determine the composition of their atmospheres.
- Experimented & determined which data reduction techniques better reveal atmospheric characteristics, such as using brighter nearby reference stars. Co-presented research at the 2016 American Astronomical Society conference in Kissimmee, FL. [8]

Additional Work Experience

Data Science Engineer – Apple Inc.

JAN 2021 - JUNE 2021 (6-month Program)

- As part of Apple’s Strategic Data Solutions team, developed data pipeline using Python that utilizes web APIs to create & maintain records of “high risk/priority” customers to mitigate unwarranted personal information searches by internal employees. Sends weekly team report with critical statistics (i.e. recent-additions, global page visits, commonality, etc.).

Data Engineer – Apple Inc.**JAN 2020 - JULY 2020 (7-month Program)**

- As part of Apple's Data Analytics Server Engineering team, developed & deployed code that utilizes Apache Spark, Python, and SQL to create interactive historical table of active iOS devices transmitting diagnostics/usage analytics data with statistics (i.e. current OS version). Informs other Apple teams about device populations used for business-critical reports, and allows for less-expensive lookups.

Technical Expert (Previously Technical Specialist) – Apple Inc.**OCT 2018 - AUG 2021**

- Resolved customer technical issues at the Apple Store Genius Bar, including software troubleshooting & hardware repairs, & re-built customer relationships by de-escalating & approaching situations with empathy & practical, ethical problem-solving.
- Provided exceptional customer experience, demonstrated ability to be flexible and knowledgeable in a high-pressure, fast-paced environment as products & services evolve.
- Supported additional departments, including in-house technology diagnostics & troubleshooting, visual merchandising, leading creative sessions (i.e. coding, visual art), & inventory operations.

Chief Telescope Operator – University of Arizona Steward Observatory**AUG 2014 - MAY 2018**

- Oversaw weekly operations of multiple on-campus telescopes, led nightly public astronomy talks, and managed a team of student telescope operators. Organized local private & educational STEM outreach events.
- Assisted professors with teaching tasks, such as grading, and class/lab preparation for general education astronomy courses.

Instructional Specialist – University of Arizona Steward Observatory**JUNE 2015, 2018, 2019**

- Developed educational STEM content (including computational astronomy projects) and oversaw operations for students at the annual Astronomy Camp. Educated students in basic principles of astronomy, physics, engineering, environmental science, and computing using inquiry-based learning techniques.
- Facilitated all-night astronomy observing sessions with professional telescopes, educated students about telescopes, electronic instrumentation, & astronomy image processing software.
- Administered medical care, worked extended/irregular hours, and managed large groups of students for 8 consecutive days/nights at remote observatories such as Kitt Peak, Mt. Graham, & Mt. Lemmon.

Volunteer & Leadership Experience**Astronomer – Vanderbilt University Dyer Observatory****JUNE 2009 - PRESENT**

- At age 13, began volunteering as an astronomer and space camp counselor at Vanderbilt Dyer Observatory, operating professional telescopes, leading monthly telescope evening lectures and tours, teaching school groups about astronomy/physics concepts, and performing science outreach experiments.

Outreach Coordinator (2016 - 2017), President (2017 - 2018) – University of Arizona Astronomy Club**AUG 2014 - MAY 2018**

- Presented engaging content weekly for undergraduate students passionate about Astrophysics.
- Organized club meetings, fundraisers, and professional research opportunities.
- Partnered with local Tucson schools to provide more than 300 events with telescope viewings and STEM activities at no cost.
- Established the free Astronomy Tutoring of Majors & Minors (ATOMM) tutoring service for upper-division astronomy and physics classes.

TIMESTEP Student Leader – University of Arizona**AUG 2015 - MAY 2018**

- Led panels & discussion groups for Tucson Initiative for Minoritized student Engagement in Science and TEchnology Program (TIMESTEP), focused on topics such as successfully navigating academic degrees, STEM careers in industry & government, and retaining underrepresented individuals in STEM.
- Coordinated hands-on workshops for topics such as battling persistent stereotypes in STEM, developing professional skills to achieve career goals, how to be a better advocate and challenges faced by marginalized groups in STEM.

Invited Talks & Panels

"Navigating the First Two Years of Physics/Astronomy Programs." Panel discussion with Khalid Omer and Kevin Perez, presented for University of Arizona's Tucson Initiative for Minoritized student Engagement in Science and TEchnology Program (TIMESTEP), Tucson, AZ, September 6, 2017.

"Gap Year Planning & Industry Careers." Panel presentation with Tyler Baines and Junellie Gonzalez-Quiles, presented virtually for University of Arizona's Tucson Initiative for Minoritized student Engagement in Science and TEchnology Program (TIMESTEP), February 5, 2020.

"Gap Year Planning." Panel presentation with Kaylah McGowan, Jose Perez, and Alex Stoken, presented virtually for University of Arizona's Tucson Initiative for Minoritized student Engagement in Science and TEchnology Program (TIMESTEP), February 16, 2022.

"Data Reconstruction: AI/ML's Place in NASA's Future." Panel presentation with Grace Goff, Adriana Holst, and Jessica Robinson, presented virtually for NASA, November 29, 2022.

Past & Present Professional Memberships

Academic Data Science Alliance, American Astronomical Society, Association for Computing Machinery (ACM), ACM SIGHPC, Deep Skies Lab, Out in STEM, UCR Women in Computing, Society of Women Engineers, Rubin Observatory LSST Science Collaborations (Informatics & Statistics, Galaxies) & Data Preview 0.2 Delegate, Graduate Women in Science

Skills

- Python, Unix, Linux, SQL, HTML, R, Git, LaTeX
- Data Science & Machine Learning (including Deep Learning, Astrostatistics): TensorFlow, Scikit-learn, PyTorch, Apache Spark, AWS
- Data Visualization & Analysis: Jupyter, Numpy, Pandas, Matplotlib, Plotly
- Microsoft Office Suite, Apple iWork, Confluence, Slack
- Telescope Operations; Observational & Theoretical Astronomy; Astronomical Image Processing & Software: IRAF, SAOImage/DS9, Aladin
- Astrophysics & Data Science Research: Developing Research Proposals, Technical Reports, Presentations, Problem Solving, Decision Making, Excellent Oral & Written Communication (including Technical), Software Development Life Cycle, Virtual & In-Person Collaboration
- STEM Outreach & Leadership: Public Speaking, Educational Outreach, Event Planning, Fundraising, Mentoring
- Computer Hardware Repairs & Troubleshooting; Retail: Customer Service, Rapport-Building, Active Listening, Empathy, Conflict Resolution
- Certifications: Apple Certified iOS Technician, Systems Tool Kit
- Extracurriculars: Web Design & Development, Digital Art, Independent Learning
